Career Objective

Full stack developer seeking to use my Typescript, React, and Node experience in a junior position. Actively cultivating my skills by working hands-on to develop, test, and deploy quality software.

Soft Skills

- Adaptability
- Excellent Communication Skills
- Strong Work Ethic
- Highly Motivated to Learn New Skills

Hard Skills

Software: (*Proficient*): Typescript, React/Redux, Node, Express, MongoDB/Mongoose, GraphQL (Apollo Server), Jest, Git, HTML/CSS

Software: (*Familiar*): Python, C#, Debian Linux, Cypress, ESLint, Material-UI, Webpack, GitHub Actions

Education

B.S. / Audio Engineering

Husson University, Bangor, Maine, USA 2009 - 2013

Software Projects

Personal Website: www.aubreynicoll.com (for additional information and projects)

PokéBook (<https://young-lowlands-97512.herokuapp.com/>)

- Developed a Pokémon-themed single-page application using Typescript and React that allows users to post status updates and follow others.
- Used Apollo Server data sources to effectively manage back-end service calls to REST APIs and MongoDB. Leveraged caching for recently accessed data.
- **Utilized:** Typescript, React, Material-UI, React-Router, Node, Apollo Server, GitHub Actions for Continuous Deployment
